What made the bear special?
Describe what the bear looked like?

Why did he look this way?
What made him a hero?

Estimation and Counting around the home:

Have a think about how many windows you have in your house. Think in your head about each room and have a guess - how many do you think there are? Write down your estimation (your guess).

Now, start in the room you are in and go around and count how many there actually are. Write this number next to your estimation. How close were you?

Now think about how many doors are in your house. Remember to count wardrobe doors too! Make an estimate and the check it. Next you could try counting all the light switches, or all the taps. Remember to write down your estimation first!

Try doing the same thing with other items you have around the house. You could try estimating how many...

- * pegs in the peg basket?
- * spoons in the drawer?
- * pairs of shoes out on the porch?
- * toys in the toy box?
